

# Ultrasound Scan at Brayford Studio Baby Scan

## Consent For 4D Ultrasound Scan

Most pregnant women have 1-2 scans in the course of their pregnancy. Any other or further scans cannot be performed without clear clinical indications.

There is no perfect test and ultrasound scan certainly is not an exception. We will try to look for fetal problems and fetal abnormalities but we may not find all of them. We cannot guarantee that we will not miss some them.

**This is a non-medical ultrasound scan**

Normal Antenatal ultrasound is not a guarantee of a normal baby at birth. Understanding this it may be noted that you may not find out the sex of the baby on this examination. One should also be aware that we may not be able always to tell the sex of the baby, and we are not by all means accurate all the time.

Studies have failed to demonstrate any adverse effects of ultrasound on baby or mother. Up to 45 minutes appointment is allowed, but scanning time is limited to the minimum time required.

I hereby consent and acknowledge that the Brayford Studio does not provide my obstetric care and that I am having this ultrasound scan for pure personal non-medical reasons. I also understand that I am responsible for the correct payment of all fees in full prior to the ultrasound scan examination
